Reference No. 500.827 relates to a claim from the contractor for cleaning of structural steel prior to fireproofing.

At a meeting with the contractor on October 2, 1969, M.P. Levy agreed that the scraping of steel was over and beyond the scope of what was originally contracted for; however, the contractor must deduct an amount of money that he would have expended for normal cleaning from the charges for scraping steel.

Please solicit a deduct price for normal cleaning from the contractor.
